SUPPLEMENT TO
REPORT NO. 25X1X

Investments totalling about 2,000,000 eastmarks will be allocated in 1953 to expand bright stock production at the SAG hydrogenation plant in Zeitz-Troeglitz. Negotiations are still pending but it is expected that the allocation of these funds will be approved.) The scheduled bright stock production by the Luetzkendorf plant is, therefore, no longer required.

25X1A Comment. Bright stock oil is a lubricating oil of especially high viscosity. Negotiations have been held for some time with a view to expanding the existing bright stock installations at the SAG hydrogenation plant in Zeitz-Troeglitz or to build a new bright stock installation at the VEB refinery in Luetzkendorf. Plans are being made in order to meet requirements for this lubricating oil in East Germany.
